The Lakes South Morang P-9 School
1:1 iPAD PROGRAM

Every student at The Lakes has the opportunity to participate in our one to one iPad program. iPads are integrated across all curriculum areas and support students to learn in a range of innovative and creative ways. Students use their iPads to create their own movies, animations, presentations and interactive books to explain and demonstrate learning across the curriculum.

Students in the Middle Years also attend specialist classes to develop skills in creating digital solutions. This includes learning how to program and code games and solutions to real world problems.

iPads are purchased by the school and leased to students over a three year period. At the end of three years, students have the opportunity to purchase and keep the device and/or enter into a lease agreement for a new device.
